» Satellite Navigation - Truths and Myths «

Professor David Last from the Royal Institute of Navigation (GB) gave a presentation

The president of the Royal Institute of Navigation visited the Institute of Geodesy and Navigation on Thursday, March 15 th. His lecture „Satellite Navigation – Truths or Myths“ was dealing with all the halftruths about satellitenavigation and problems concerning the security. Last pointed out that every „socially-inadequate teenager with acne and no girl-friend, can cause havoc in the Pentagon and panic in the banking system.“ The professor reminded further: “Satellite navigation is like the computer business before the first virus. And we have no McAfee and no Norton!”
